

CENTER TERMITES YEARLY CONTROL SERVICE POLICY

A yearly inspection will be performed on your property, to insure that your most valuable asset remains protected from a variety of wood destroying pests and fungus/dry-rot infections.

During the inspection, our technicians will carefully check for any tell-tale signs of new infestations: Discarded wings, dead termites, kick-out holes in the wood and softness or structural damage. Our licensed professionals are also checking for conditions conducive to termites: Plumbing leaks or other excessive moisture conditions, earth to wood contact, infested firewood piled close to the dwelling, and all other signs that the licensed inspector is trained to detect.

- ✓ A report will be issued if any new activity is noted.
- ✓ Active infestations will be removed and treated
- ✓ If no activity is noted, a preventive treatment will be performed.
- ✓ All work under your original contract guarantee will be warranted for another year.
- ✓ You'll have peace of mind that Center Termite Control, Inc. is looking after the best interest of your family and your home.
- ✓ Our Guarantee: If any signs of termite infestation are noticed, you can call on the experts at Center Termite Control and we will quickly and professionally schedule a free re-inspection at no cost to you.
